

# **JANDAKOT AIRPORT** LANDSCAPE DESIGN GUIDELINES

Jandakot Airport Holdings Pty Ltd 16 Eagle Drive Jandakot WA 6164

### 1 Introduction

The Jandakot Airport Business Park Landscape and Design Guidelines were developed to guide development at Jandakot Airport in order to achieve an environmentally appropriate outcome with a high level of amenity and integrated appearance.

The purpose of this document is to provide updated information on the landscaping requirements at Jandakot Airport (including 'Jandakot City').

Plants should be chosen in according to the following list of preferences (highest to lowest):

- 1. Plants indigenous to the Jandakot area (including species that provide food or habitat for native fauna, such as Carnaby's Cockatoos and Bandicoots where possible).
- 2. Australian native plants (including species that provide food or habitat for native fauna, such as Carnaby's Cockatoos and Bandicoots where possible).
- 3. Approved non-native water-wise plants.

A strong unifying theme of geometric lines and block planting is to be applied across the sites in order to integrate the designs.

# 2 Landscaping Approvals Process

For new developments (and redevelopment of existing facilities), the landscape design plan is to be submitted as a component of the Building Permit Application.

Minor garden maintenance, additional planting and replacement of plants can occur at any time without additional approval provided the works are consistent with these guidelines. If there is any doubt as to whether the proposed plant selection is appropriate, tenants should consult with either the JAH Environment Manager or Development Approvals Manager.

### 3 Key Landscaping Areas

# 3.1 Streetscapes

Streetscapes will generally consist of strong avenue plantings with lower level shrubs. Swales for road stormwater infiltration are provided in roadside verges and median strips where required.

## 3.2 Verges

Generally, roadside verges at Jandakot Airport are 4.5 to 6m wide (from the road edge/kerb to the site boundary). These verges shall be landscaped, reticulated and maintained by the Lessee unless stated otherwise within the lease agreement. Drainage swales and/or recharge basins may also be incorporated into this landscape strip where necessary.

# 3.3 Building Setbacks

A minimum landscaping setback is required for new developments. Developers (or their appointed contractors) shall allow for a landscaped strip / buffer zone along the front boundary of the site. A continuous landscape strip (6m wide in Jandakot City and 3m wide in other airport precincts) setback from the roadside leased boundary must be provided and maintained along the frontage of the Jandakot Airport site. This landscape strip shall incorporate landscaping in accordance with these guidelines. No building or structure (excluding approved utilities/services and signage) may be located within this landscaping setback, though it may incorporate drainage swales and/or recharge basins.

### 3.4 Special Consideration for Leases Adjoining Air Movement Areas

For air safety reasons, tenants with landscaping areas adjoining (or in the immediate vicinity of) air movement areas should **NOT** plant:

- · deciduous trees; and
- trees that are known to attract birds.
- Trees that will grow above the Obstacle Limitation Surfaces (OLS) and impact the safety of aircraft movements.

### 4 Be Water-Wise

Water-wise landscape design is not only good for the environment, but can also save money by reducing the volume of water for irrigation. Keep the following in mind when designing your landscape:

- Use native, water-wise plants wherever possible.
- Mulch all garden beds;
- Use water-efficient irrigation systems such as sub-surface drip irrigation;
- Minimise the use of lawns:
- Consider capturing and using rainwater for garden irrigation.

### 5 Trees

### 5.1 Choosing the Right Tree

Trees are an important component of landscaping projects but it is essential to choose the correct tree for that particular location. Key factors to consider include:

- Ensuring it is an approved species under these guidelines;
- The height and width that the tree will be when mature relative to the area where it is to be planted;
- Consider dwarf varieties for smaller areas;
- The proximity of above-ground and below-ground services, footpaths, paving, foundations etc. that may be damaged by branches and growing roots;
- Whether the tree has a tendency to drop branches or produce flowers/fruits/seeds in an area that may create a safety hazard;

### 5.2 Trees Management

Trees in 'Common Areas' are managed by Jandakot Airport Holdings. Amenity trees in common areas are regularly inspected and professional arborists are engaged to undertake pruning of mature trees in order to ensure public safety.

Maintenance of vegetation within a leased, and the road verge in front of the leased area, is the responsibility of the lessee unless agreed otherwise. Trees that provide potential habitat for native species cannot be removed without permission, even within leased areas. However, pruning can (and should) occur in order to make the tree safe (e.g. removal of dead wood and dangerous limbs).

# 5.3 Tree Planting Guide

- a) Chose right tree for location. Take into account: underground services, buildings, car parks, footpaths & overhead services.
- b) Always purchase a good quality tree, from a good accredited nursery or tree grower.
- c) The planting hole should be 2-3 times the size of pot/bag. Square or dish-like holes are recommended when planting. If using the existing sandy soil add a good quality Soil Conditioner to the mix. Water before planting, place tree in holes and backfill using soil mix from hole. Do not add fertilizers (smaller the tree the better the result).
- d) Staking: trees grow stronger and develop quicker without stakes, however if you need to stake: use 2 wooden stakes 500mm apart from trunk of tree and tie loose with tree tie material.
- e) Mulch: 75-100mm thick about 2m from trunk, keeping away from trunk itself. Water in the tree thoroughly.

Note: Root barriers should be used when planting next to buildings, car parks & foot paths taking care to avoid underground and overhead services.

Garden beds: root barriers are used as a precaution for damage to facilities.

Follow up maintenance: required to check for pest / disease also condition of mulch and soil dampness.

### 6 Sourcing Plants and Garden Materials from Approved Suppliers

The plant disease known as 'dieback' (*Phytophthora cinnamomi*) can occur in suburban gardens, landscaped areas, golf courses, plant nurseries with poor hygiene practices, and horticultural plantations as well as native bushland.

Tenants neighbouring Conservation Precincts need to be particularly vigilant in managing dieback risks.

In order to prevent the introduction of plant diseases, plants for landscaping must be purchased from nurseries that hold accreditation under the Nursery Industries Accreditation Scheme Australia (NIASA). Nurseries that hold similar accreditations can be used with the approval of the JAH Environment Manager.

Garden mixes and mulches should also be sourced from suppliers with NIASA accreditation, although approval may be sought from JAH to utilise suppliers with similar dieback-free certification processes.

## 7 Approved Plant Species Lists

The section below details those species preferred for use in the development.

It is recognised that the species and plant varieties may not always be available from approved nurseries, and new varieties are constantly being released. In rare cases, the species below may not be applicable to the type of landscaping required for a particular purpose. In such instances, the following options exist:

- Supplement with species indigenous to the Jandakot Airport area (Appendix 1).
- Provide details and justification for use of additional plant species/varieties and seek
  JAH approval either during the Building Application approvals process or directly
  from the JAH Environment Manager.

### 7.1 Plants Used by Carnaby's Cockatoo

A list of species utilised by Canaby's Cockatoo has been developed by the WA Department of Conservation and Land Management and can be found at

http://www.dec.wa.gov.au/management-and-protection/threatened-species/5983-plants-for-carnabys-search-tool.html

DEC have also developed a search tool to aid in selecting suitable bird-friendly plants for particular areas. http://www.dec.wa.gov.au/apps/plantsforcarnabys/index.php

The "Choose for Black Cockatoos" plant label has recently been launched to promote a selection of native species that are used for food by Carnaby's cockatoo that are also perfect for planting in selected urban areas. Refer to Appendix 2 for further details.

# Jandakot Airport - Plant Species for Landscaping

Plants highlighted in green are JAH's preferred species that have are known to grow successfully at the airport in in surrounding suburbs. JAH may approve the use of other species and varieties in addition to those listed below if deemed consistent with the JAH Landscaping Guidelines. Heights and widths are generally maximum estimates when grown in ideal conditions and may vary dependent on the variety chosen.

\*denotes plant not native to WA and will only be approved if suitable WA native species cannot be sourced.

Species	Common Name	Links	Notes
Trees			
Agonis flexuosa	Peppermint	http://florabase.dpaw.wa.gov.au/browse/profile/5316	4-10m(h) x 3-5m(w). Best in large open areas.
Allocasuarina fraseriana	Sheoak	http://florabase.dpaw.wa.gov.au/browse/profile/1728	5-15m(h). Unsuitable for use in turf areas due to high level of leaf/fruit drop.
Angophora costata*	Smooth-barked Apple*	*East Coast Native <a href="http://www.anbg.gov.au/gnp/gnp8/ango-cos.html">http://www.anbg.gov.au/gnp/gnp8/ango-cos.html</a>	10-30m(h) x 6-15m(w). Only in very large open areas. JAH approval required
Banksia attenuata	Slender Banksia	http://florabase.dpaw.wa.gov.au/browse/profile/1800	Up to 10m (h).
Banksia menzesii	Firewood Banksia	http://florabase.dpaw.wa.gov.au/browse/profile/1834	Up to 10m (h).
Brachychiton acerofolius*	Illawarra Flame Tree*	*East Coast Native	Deciduous with thorny brittle branches. Up to 30 <sup>+</sup> m(h). JAH approval required.
Callitris preissii	Rottnest Island Pine	http://florabase.dpaw.wa.gov.au/browse/profile/96	Up to 9m(h) x 4-6m(w).
Corymbia calophylla	Marri	http://florabase.dpaw.wa.gov.au/browse/profile/17104	Up to 60m(h). Limited use in large open areas such as parklands only.
Corymbia ficifolia	Red Flowering Gum	http://florabase.dpaw.wa.gov.au/browse/profile/17103	2-8m(h) depending on variety.
Eucalyptus forrestiana	Fuschia Gum	http://florabase.dpaw.wa.gov.au/browse/profile/5652	Mallee or tree, 1.5-6m(h).
Eucalyptus gomphocephala	Tuart	http://florabase.dpaw.wa.gov.au/browse/profile/5659	10-40m(h) x 8-15m(w). Limited use in large open areas such as parklands only.
Eucalyptus marginata	Jarrah	http://florabase.dpaw.wa.gov.au/browse/profile/5708	20-40m(h) x 20-40m(w). Limited use in large open areas such as parklands only.
Eucalyptus todtiana	Coastal Blackbutt	http://florabase.dpaw.wa.gov.au/browse/profile/5790	5-8m(h).
Eucalyptus torquata	Coral Gum	http://florabase.dpaw.wa.gov.au/browse/profile/5792	4-11m(h).
Eucalyptus victrix	Little Ghost Gum	http://florabase.dpaw.wa.gov.au/browse/profile/14548	5-10m(h) depending on variety.
Melaleuca pressiana	Rottnest Island Tea Tree	http://florabase.dpaw.wa.gov.au/browse/profile/5952	3-8m(h) x 2-4m(w).
Melaleuca viridiflora*	Broad-leaved Paperbark	*Northern Australian Native <a href="http://asgap.org.au/m-vir.html">http://asgap.org.au/m-vir.html</a>	3-10m(h) depending on variety.
Feature Plants			
Macrozamia reidleii	Zamia palm	http://florabase.dpaw.wa.gov.au/browse/profile/85	
Xanthorrhoea preissii	Grass Tree	http://florabase.dpaw.wa.gov.au/browse/profile/1256	
Shrubs (Medium to Large)			
Acacia lasiocarpa	Panjang	http://florabase.dpaw.wa.gov.au/browse/profile/3409	
Acacia pulchella	Prickly Moses	http://florabase.dpaw.wa.gov.au/browse/profile/3502	

Species	Common Name	Links	Notes
Adenanthos cygnorum	Woolly Bush	http://florabase.dpaw.wa.gov.au/browse/profile/1775	
Agonis flexuosa nana	Dwarf Willow Myrtle	http://www.planthis.com.au/plant-	
		information.asp?gardener=8429	
Astartea fascicularis		http://www.anbg.gov.au/gnp/gnp2/astartea-fascicularis.html	
Beaufortia elegans		http://florabase.dpaw.wa.gov.au/browse/profile/5382	
Callistemon spp.	Eg "Little John",		
Eremophila nivea	Silky Eremophila	http://florabase.dpaw.wa.gov.au/browse/profile/7244	
Grevillea spp			
Hemiandra pungens	Snakebush	http://florabase.dpaw.wa.gov.au/browse/profile/6839	
Hypocalymma angustifolum	White Myrtle	http://florabase.dpaw.wa.gov.au/browse/profile/5817	
Melaleuca linariifolia 'Little Red'	'Little Red'	http://www.gardenersbest.com.au/plants.asp?id=129	
Melaleuca nesophila	Mindiyed	http://florabase.dpaw.wa.gov.au/browse/profile/5943	
Melaleuca thymoides		http://florabase.dpaw.wa.gov.au/browse/profile/5980	
Oleria axillaris	"Little Silver, 'Little Smokie'	http://florabase.dpaw.wa.gov.au/browse/profile/8127	
Ricinocarpos cyanescens	Coastal Wedding Bush	http://florabase.dpaw.wa.gov.au/browse/profile/13683	
Westringia spp.	Eg Coastal Rosemary	http://www.anbg.gov.au/gnp/gnp1/westringia-fruticosa.html	
Shrubs (Small to Medium)			
Anigozanthos humilis	Catspaw	http://florabase.dpaw.wa.gov.au/browse/profile/1409	
Anigozanthos manglesii	Kangaroo Paw	http://florabase.dpaw.wa.gov.au/browse/profile/1411	
Anigozanthos spp.	Eg 'Big Red', 'Ruby Gold', <i>A.flavidus</i> hybrids, 'bush gems' etc.		
Astroloma xerophyllum		http://florabase.dpaw.wa.gov.au/browse/profile/6339	
Calytrix angulate	Yellow Starflower	http://florabase.dpaw.wa.gov.au/browse/profile/5439	
Calytrix flavescens	Summar Starflower	http://florabase.dpaw.wa.gov.au/browse/profile/5458	
Conostephium preissii		http://florabase.dpaw.wa.gov.au/browse/profile/6349	
Conostylis aculeata	Prickly Conostylis	http://florabase.dpaw.wa.gov.au/browse/profile/1418	
Conostylis candicans	Grey Cottonheads	http://florabase.dpaw.wa.gov.au/browse/profile/1427	
Darwinia pinifolia		http://florabase.dpaw.wa.gov.au/browse/profile/5524	
Daviesia nudiflora		http://florabase.dpaw.wa.gov.au/browse/profile/3824	

Species	Common Name	Links	Notes
Dianella spp	Eg 'Little Rev', 'Little Jess', "Silver Streak'	http://www.ozbreed.com.au/strappy-leaf-plants/index.html	
Gompholobium confertum		http://florabase.dpaw.wa.gov.au/browse/profile/10909	
Grevillea crithmifolia	'Green Carpet'	http://florabase.dpaw.wa.gov.au/browse/profile/1982

#### 7.2 Appendix 1. Jandakot Airport Flora Species List

The approved species lists may also be supplemented with species indigenous to the Jandakot Airport area as listed below. Use of these additional species must be approved by JAH during the landscaping approval process.

Acacia applanata	
Acacia huegelii	R
Acacia pulchella	R
Acacia saligna	R
Acacia stenoptera	S
Acacia willdenowiana	
Adenanthos cygnorum	S
Adenanthos obovatus	S
Allocasuarina fraseriana	S
Allocasuarina humilis	S
Amphipogon laguroides	
Amphipogon turbinates	
Anigozanthos humilis	
Anigozanthos manglesii	R
Aotus sp. procumbent	
Arnocrinum preissii	
Astartea fascicularis	R
Astroloma xerophyllum	S
Austrodanthonia occidentalis	
Austrodanthonia pilosa	
Austrostipa compressa	
Baeckea camphorosmae	R
Banksia attenuata	S
Banksia grandis	S
Banksia ilicifolia	S
Banksia littoralis	S
Banksia menziesii	S
Banksia nivea	S
Baumea articulata	
Beaufortia elegans	
Beaufortia squarrosa	
Boronia busselliana	
Boronia crenulata	R
Boronia ramosa	
Bossiaea eriocarpa	S
Brachyloma preissii	
Burchardia congesta	R
Caladenia discoidea	
Caladenia flava	

Caladenia huegelii	
Caladenia longicauda	
Calectasia narragara	
Calytrix angulata	
Calytrix flavescens	R
Calytrix fraseri	
Calytrix strigosa	
Cassytha flava	R
Cassytha glabella	R
Cassytha racemosa	
Centrolepis aristata	
Centrolepis drummondiana	
Centrolepis humillima	
Chamaescilla corymbosa var. corymbosa	
Chordifex microcodon	
Comesperma calymega	R
Conospermum triplinervium	S
Conostephium minus	
Conostephium pendulum	S
Conostephium preisii	
Conostylis aculeata	R
Conostylis aurea	
Conostylis caricina ssp. Caricina	
Conostylis juncea	
Conostylis setigera ssp. Setigera	R
Crassula colorata	
Croninia kingiana	
Cryptostylis ovata	R
Cyanicula gemmata	
Cyathochaeta avenacea	R
Dampiera linearis	R
Danthonia pilosa	
Dasypogon bromeliifolius	S
Daviesia gracilis	
Daviesia incrassata	S
Daviesia juncea	
Daviesia nudiflora	
Daviesia physodes	S
Daviesia triflora	

Desmocladus fasciculatus	R
Desmocladus flexuosus	R
Dianella revoluta	S
Dielsia stenostachya	
Diuris corymbosa	
Diuris emarginata	
Diuris laxiflora	
Drosera erythrorhiza	R
Drosera macrantha	
Drosera menziesii ssp. Penicillaris	
Drosera paleacea ssp. Paleacea	
Drosera pulchella	
Eremaea asterocarpa	
Eremaea pauciflora	
Eriostemon spicatus	R
Eucalyptus gomphocephala	R
Eucalyptus marginata	S
Eucalyptus rudis	R
Eucalyptus todtiana	S
Euchilopsis linearis	
Euchiton sphaericus	
Eutaxia virgata	
Gastrolobium capitatum	
Gnaphaluim sphaericum	
Gompholobium confertum	
Gompholobium scabrum	
Gompholobium tomentosum	R
Gonocarpus pithyoides	
Goodenia pulchella	
Haemodorum paniculatum	R
Haemodorum spicatum	
Hardenbergia comptoniana	R
Hemiandra pungens	R
Hensmania turbinata	
Hibbertia aurea	
Hibbertia huegelii	S
Hibbertia hypericoides	S
Hibbertia pachyrrhiza	
Hibbertia racemosa	R
Hibbertia subvaginata	
Homalosciadium homalcarpum	
Hovea trisperma	R
Hyalosperma cotula	
Hypocalymma angustifolium	R
Hypocalymma robustum	S

S = Dieback Susceptible; R = Dieback Resistant Taken from information compiled by E.Groves, G.Hardy and J.McComb, Murdoch University. Species list reviewed by Mark Brundrett, 2011.

### Appendix 2. Plants for Carnaby's Cockatoos

# **Choose for Black-Cockatoo Plant Selection**

### Slender Banksia (Banksia attenuata)

This medium-sized tree produces beautiful nectar-filled yellow flower cones between October and February. Found mainly on the Swan Coastal Plain, the seeds, grubs and nectar from the cones provide food for Carnaby's and other birds. florabase.dec.wa.gov.au/browse/profile/1800

### Firewood Banksia (Banksia menziesii)

The stunning red, yellow and pink flowers of this medium-sized tree bloom from February to October. Carnaby's and other wildlife love this Swan Coastal Plain tree for its nectar, grubs and seeds. Dwarf varieties work well in smaller gardens.

### Acorn Banksia (Banksia prionotes)

A fantastic medium-sized tree flowering from February to August, the large cream and orange acorn-like flower cones are used by Carnaby's and sother birds and insects. Dwarf varieties are great for small gardens.

florabase.dec.wa.gov.au/browse/profile/1842

### Parrot Bush (Banksia sessilis)

Grown as a hedge or cluster of plants, this large shrub provides food for Carnaby's and is also a great garden screen. The cream and yellow flowers bloom most of the year, from April to November.

florabase.dec.wa.gov.au/browse/profile/32076

### Urchin Dryandra (Banksia undata)

Native to the Perth Hills, this large shrub displays showy yellow flowers between July and October, and is a wonderful food source for Carnaby's and Baudin's Black-Cockatoos.

florabase.dec.wa.gov.au/browse/profile/32053

# Lesser Bottlebrush (Callistemon phoeniceus)

The scarlet brushlike flowers of this small tree provide an important nectar source for Carnaby's and many bird species from September to December. Dwarf varieties look great in smaller gardens.

florabase.dec.wa.gov.au/browse/profile/5395

### Marri (Corymbia calophylla)

This large tree produces masses of stunning white to pink flowers from December to May. The nuts, hollows and sturdy branches of this tree provide food, nesting and roosting habitat for Carnaby's, Baudins and Red-tailed Black-Cockatoos.

florabase.dec.wa.gov.au/browse/profile/17104

# Jarrah (Eucalyptus marginata)

An excellent large tree, Jarrah attracts all three species of Black-Cockatoos for the food, nesting and roosting opportunities it offers. The beautiful white-cream to pink flowers bloom from June to January.

 $\underline{florabase.dec.wa.gov.au/browse/profile/5708}$ 

### **Choose for Black-Cockatoo Plant Selection**

### Fuchsia Grevillea (Grevillea bipinnatifida)

The showy red to orange flowers of this medium-sized striking shrub bloom from June to December. Producing seeds that feed Carnaby's, the beautiful flowers also supply nectar to a variety of wildlife, especially native birds.

An attractive shrub with fragrant white/yellow/pink clusters of delicate flowers from May to September. Its seeds supply food for Carnaby's and Baudin's Black-Cockatoos, and its dense foliage offers protection for small birds.

florabase.dec.wa.gov.au/browse/profile/2175

### Two-Leaf Hakea (Hakea trifurcata)

Great as a screen or windbreak, the distinctive leaves and delicate white to pink flowers (April to October) make this large shrub attractive in any garden. The seeds provide food for both Carnaby's and Baudin's Black-Cockatoos.

florabase.dec.wa.gov.au/browse/profile/2214

### Wavy-leafed Hakea (Hakea undulata)

Mostly found in the Perth Hills, the delicately-veined green leaves offset the clusters of bright white flowers from July to October on this beautiful garden plant. A medium-sized shrub with dense foliage that provides protection for small birds, its seeds feed both Carnaby's and Baudin's Black-Cockatoos.

florabase.dec.wa.gov.au/browse/profile/2215
